SANITARY INSPECTION GRADE

SANITARY INSPECTION GRADE

- ▶ This project analyzes restaurant inspection results in New York City.
- ▶ The goal is to understand how restaurants perform based on grades, cuisine types, and borough locations.
- ▶ This analysis helps identify food safety trends and overall restaurant quality in New York City.

TOPIC

Methodology

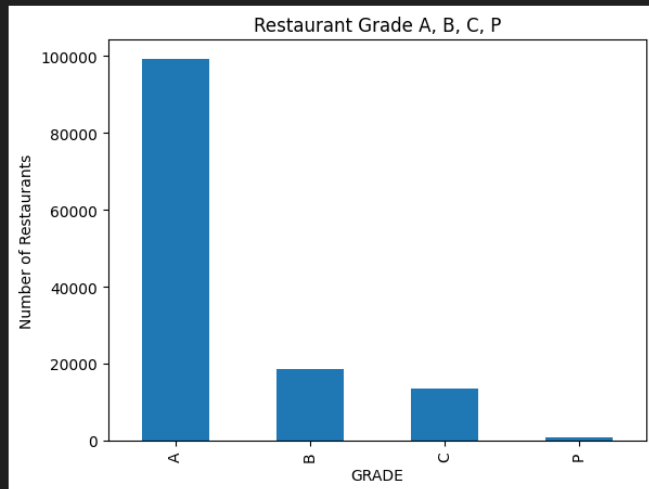

- Used Python through Google Colab.
- Used Pandas for data cleaning and analysis
- used Matplotlib for data visualization to display restaurant's grade, cuisines types and borough locations.

Data Source

- ▶ Dataset: NYC Open Data – Restaurant Inspection Results.
- ▶ https://data.cityofnewyork.us/Health/DOHMH-New-York-City-Restaurant-Inspection-Results/43nn-pn8j/about_data

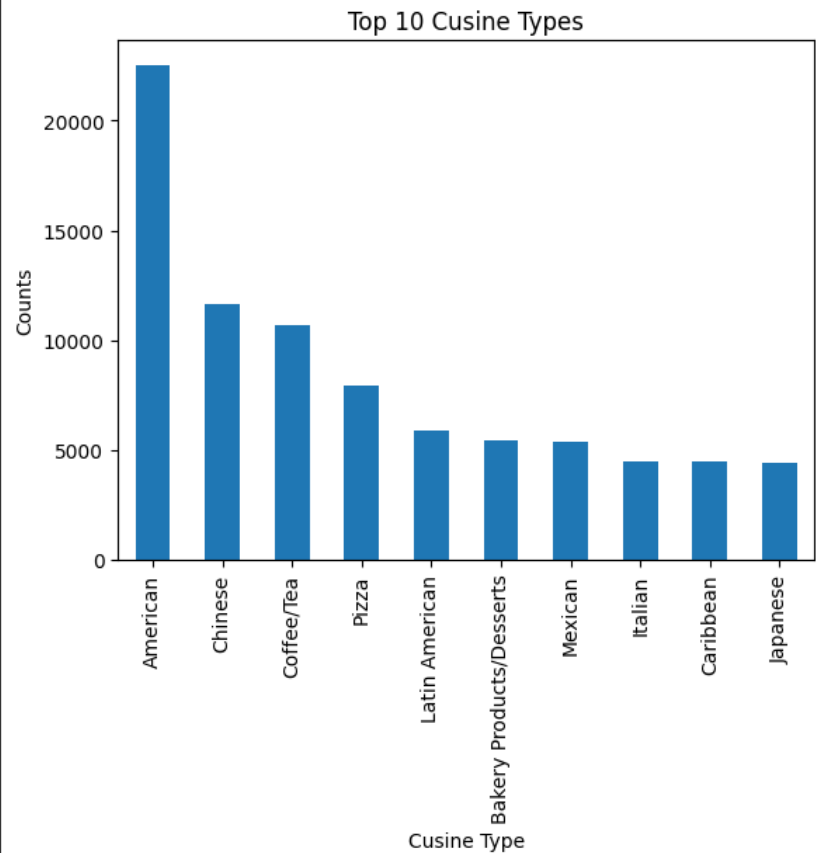

Data Cleaning

- ▶ Selected relevant columns - Borough, Cuisine Description, Grade, and Score.
- ▶ Removed missing values.
- ▶ Filtered grades to A, B, C and P.
- ▶ Removed invalid borough values.

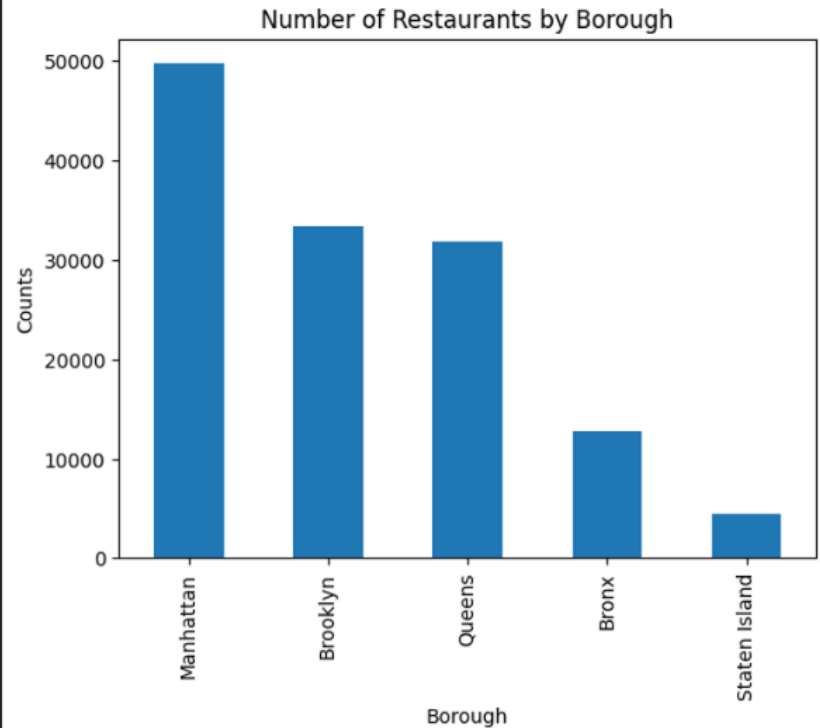

- ▶ This chart shows the distribution of restaurant inspection grades.
- ▶ Most restaurants In NYC received Grade A.
- ▶ A small number of restaurants received Grade B and Grade C.
- ▶ Very few restaurants have a pending grade

Restaurants Grades

- ▶ This chart shows the top 10 most common cuisine types in New York City.
- ▶ American cuisine is the most common, followed by Chinese and Coffee/tea.
- ▶ This reflects the diversity of food options in New York City.
